ALLSTAR Link Node on Cell Phone – Apple Version

Author: Andrew Maddox, AE0WZ

Installing "OpLine" on an Apple iPhone to Have AllStarlink Connectivity

1. You must have an AllStarlink account.
    - Get one at: https://allstarlink.org/register/index.php
    - You DO NOT need an AllStarLink node to use OpLine
2. Download Opline from the App Store – Cost $6.99

3. Open the App
    - Enter your call sign
    - Select Web Transceiver
    - Sign into AllStarLink -- Enter your AllStarlink.org Web Site Password (Allow Apple to save password)
        - Note: – This is not your AllstarLink node password, if you have one.
    - Notification – select the default – continue
    - Audio Check – Allow Microphone Access – Allow – continue after testing mic
    - Select Favorites at
        - +Add a Node (the first time)
            - to add additional nodes, click +Node in upper right corner
    - Enter "W0RRZ"
    - Select "+" should change to green check mark
    - Select Done
4. Now to connect to this repeater
    - On the Favorites tab click on the Green "Link" to select this repeater.
    - Now switch to the "Connect" tab
        - Ringing will show
        - When you connect – all will be green
        - Press "Push to Talk" when you want to transmit
5. When you are done with the repeater, click red "Disconnect" at the bottom of the screen.

    Note: if you add the N2KNK repeater node – there will be two listed
    N2KNK WestCo (41304) is the node you want to select
